

Instruction for install ISAAC Discount Spotter

Client: just open the trunk4.xcodeproj to compile the project.

Server: default server site: <http://phptest.isaac.nl/iphone/>

default mysql database: https://phpmyadmin.byte.nl/index.php?db=db020025_iphone_demo
with username: u020025_iphone
pass: teh83bet

Ftp account: [iphone@ftp.phptest.isaac.nl@ftp.byte.nl](ftp://iphone@ftp.phptest.isaac.nl@ftp.byte.nl)
pass: teh83bet

if you decide to change the server:

1. first make a mysql database, and import the server database file: db020025_iphone_demo.sql.zip
2. then upload the remaining files in "server" folder to your host.
3. change username, password and database to connect in connect.php
4. open the client project trunk4.xcodeproj, go to file AugmentedRealityISAACAppDelegate.m, find of the string of "<http://phptest.isaac.nl/iphone/>" and replace by your new host address.
